GANLAN GOLD

WEBSITE DEVELOPMENT SPECIFICATION

English V7 — Approved French specification translated for the developer • B2B commercial website for Chinese importers • 25 October 2026

1. Purpose and visual identity

Build a long, scrolling, responsive landing page designed primarily for Chinese mobile users. Color palette: deep olive green #173E2B, gold #DCC183 and ivory. Immersive photographs of Moroccan olive groves, natural light and premium product styling. The visuals below are design references, not final production assets.

Simplified Chinese takes absolute priority: headlines, product labels, descriptions and buttons must be in Chinese. Smaller English text appears underneath. The international name GANLAN GOLD is paired with a provisional Chinese name, to be cleared before printing. A native Chinese speaker must proofread all product and regulatory wording.

Visual reference: use this homepage banner as inspiration for colors, bottles and vegetation only. IMPORTANT: the corrected banner has no individual product MOQ. Prices and the global MOQ must be editable HTML/CSS elements, never text embedded in an image.

2. Single-page website sections

Homepage

Large panoramic hero image, Chinese headline with English subtitle, brand and four products. Prominent Request a Quote button.

Our products

Four product cards with separate photographs, capacity, large dynamic CNY price and smaller reference USD price underneath. NO MOQ below any bottle or tin. Do not display EUR on the public website.

Our origin

Fouad's agricultural operation, selected neighboring olive growers, sourcing and lot traceability. Do not claim all olive oil comes exclusively from one farm.

Visit our olive groves

Invite importers to visit the Moroccan groves and production facilities; include a visit-request form.

Export services

Explain responsibilities clearly: export preparation and dispatch from Morocco, and provision of applicable export documents.

Contact

Show Gisèle in Guangzhou first, then Lassad and Fouad; use actual WeChat QR codes and clickable phone/WhatsApp links.

3. Product range and indicative export prices

Size	Reference USD	Displayed CNY (indicative)	Internal EUR (indicative)
250 ml	$4.00	≈ ¥29	≈ 3,57 €
500 ml	$7.30	≈ ¥49	≈ 6,52 €
750 ml	$10.10	≈ ¥69	≈ 9,02 €
5 L	$38.50	≈ ¥259	≈ 34,37 €

Working commercial prices, to be validated against actual costs before launch. On the public website show CNY prominently and USD below; do not show EUR. Prices are quoted from Morocco under the Incoterm confirmed in the quotation. International freight, applicable international transport insurance, Chinese customs clearance, duties and import taxes are excluded.

4. MOQ — one overall minimum order (separate section)

GLOBAL COMMERCIAL MOQ: 7,500 litres of olive oil per order, across all product formats. Display this minimum ONCE in a dedicated “Wholesale Orders / MOQ” section after the four products. Do not show an MOQ per bottle, tin or format; never show “1,000 bottles.” Mixed 250 ml, 500 ml and 750 ml bottle orders are permitted. The 5 L tin is available for professional customers.

Internal logistics illustration (not contractual): an indicative mixed 20-foot container load of 5,200 × 250 ml + 7,500 × 500 ml + 3,600 × 750 ml = 16,300 bottles, or 7,750 litres. The 7,500 L MOQ is a commercial policy, NOT a guaranteed container capacity. The bottling partner and freight forwarder must validate loading plan, gross weight, palletization and maximum payload.

Chinese text to display in its own section: 最低订购量（MOQ）：7,500 升橄榄油。支持 250 毫升、500 毫升和 750 毫升混合订购。具体装柜方案以最终确认为准。

English subtitle (smaller): Minimum order quantity (MOQ): 7,500 litres of olive oil per order. Mixed 250 ml, 500 ml and 750 ml bottle sizes available. Loading plan subject to confirmation.

5. Logistics, Incoterms and quotations

GANLAN GOLD coordinates sourcing, bottling, quality control, export formalities and delivery to the agreed Moroccan handover point. If FOB is agreed, the goods are delivered loaded on board at the named Moroccan port. For container cargo handed to a terminal, consider FCA with the freight forwarder. The buyer arranges and pays for international freight and Chinese import operations according to the agreed Incoterm, including Chinese customs clearance, duties and taxes.

Commercial documentation: commercial invoice, packing list, certificate of origin, quality-control documentation and applicable export/customs documents. Do not claim documents have already been issued if they have not. Promise to provide required documents at shipment only after confirming they can be obtained.

6. Currency conversion — developer requirements

All four reference USD prices must be editable in the back office. Retrieve daily European Central Bank EUR/CNY and EUR/USD reference rates, then calculate USD/CNY = (EUR/CNY) ÷ (EUR/USD). Display indicative CNY prices rounded up to the next whole yuan; keep contractual USD prices unchanged. Show the date of the latest exchange rate. If the feed is unavailable, retain the last valid rate and clearly show its date. The final quote is confirmed in USD and valid for 15 days, unless otherwise specified.

7. Contacts and lead conversion

Gisèle — local contact in Guangzhou, China: +86 134 2751 3756 (click-to-call; do not invent a WeChat account).

Lassad — WhatsApp +33 6 34 14 26 32; official WeChat QR code supplied.

Fouad — WhatsApp +40 724 815 229; official WeChat QR code supplied.

Lassad WeChat

Fouad WeChat

Quote-request form: company, country, contact person, WeChat/email, products, quantities, destination port, message and privacy consent. Include anti-spam measures, HTTPS and Chinese/English confirmation messages.

8. Independent product images for flexible page layout

Each visual below must be delivered as a SEPARATE asset: Simplified Chinese is primary on the label (摩洛哥特级初榨橄榄油), with GANLAN GOLD branding and smaller English text. Prices must be dynamic HTML elements below the images, never embedded in photographs. Alternate image placement left and right down the page. The 5 L tin must appear substantially larger than the bottles.

Individual visual — 250 ml

Individual visual — 500 ml

Individual visual — 750 ml

Individual visual — 5 L tin

9. Deliverables and acceptance criteria

Responsive desktop/mobile site; Simplified Chinese first, English second; four dynamic product prices WITHOUT individual MOQ; one separate global MOQ section stating 7,500 L; gallery of individual product assets; actual contact details and QR codes; quotation form; USD price administration; search visibility and performance appropriate for mainland China; legal/privacy pages; mobile and link testing; backup and handover instructions.

PRE-LAUNCH CHECK — V7: ALL FOUR individual product images must feature Chinese label text, with English secondary. No MOQ per product: only the 7,500-litre global MOQ in its dedicated section. No static price text embedded in product photography. Have Chinese copy and legally required product labels reviewed by a qualified professional before production.
